

What is “The Caleb International”?

Japan, alongside the rest of the world, has seen major change in recent years.

One of the outstanding changes is aging, with many of us seeing upwards of 30 years of long life after retirement.

Especially in Japan, the senior generation of over 65 years old is predicted to occupy 40% of the total population by 2060.

Various issues related to this aging are already becoming prominent, with anxiety causing increased number of elders to take a pessimistic view about their longevity.

However, we believe this extension of life should be seen as a blessing.

Caleb International was established to provide a chance for elders to turn their post-retirement life into one of blessing through mutual encouragement and assistance of group members.

Seniors have abundant social experiences and firm belief in God and possess the Good News to share. Therefore, let's walk on the Way to our final goal of life remembering the promises of the Kingdom of God together sharing the same vision.
